- Windows: Windows XP/Vista/7/8/8.1/10 (might work with reduced functionality on older versions)
- OSX: macOS 10.7-11.2 (old versions: v1.30 supports macOS 10.6, and v1.28 supports macOS 10.4 and PPC)
- Linux: apparently works with WINE
- A reasonably fast CPU
- A healthy amount of RAM (1GB+, especially when encoding to LCF)

LICEcap v1.31 for macOS (Feb 17 2021) (876kb DMG)

- macOS: Big Sur support (thanks https://github.com/ganja-panji)
- macOS: Apple Silicon (M1) native support
- macOS: now requires macOS 10.7 or later (10.6 users can use v1.30 for eternity)

LICEcap v1.28 for Windows (December 2 2017) (230kb installer)

- new icon (thanks White_Tie!)
- LCF: fix crash when error opening output file
- gif: use WDL_FileWrite to write to disk rather than fopen()/_wfopen(), lock files while writing
